Virtual TA: AI for Education & Training (Education)

Client Top 20 US University, (50,000+ Students)

Challenge:

Professors spent excessive time grading, providing feedback, and fact-checking student work.

Manual grading delayed student responses and impacted engagement.

High administrative workload led to reduced teaching focus.

Solution:

Virtual TA, an AI-powered system for automated grading and feedback.

Enabled AI-generated summaries of lecture materials to enhance learning.

Integrated fact-checking AI, improving academic integrity.

Result:

50% reduction in assessment time, allowing professors to focus on teaching.

Higher student engagement with AI-generated learning materials.

Enhanced academic accuracy, reducing fact-checking errors.
